Average Daily Balance method (Balance Subject to Interest Rate): Your interest is computed on all purchases and cash advances (collectively "advances") from the date each advance is posted until we receive payment in full (there is no grace period). We figure the interest on your line of credit by multiplying the daily periodic rate by the "Average Daily Balance" of your line of credit (including current transactions) and multiplying by the number of days in the billing cycle. To get the Average Daily Balance or your line of credit each day, add any new advances or debite, and cubiter any non-monte and credits on your get on the advance of the day and credits on your of the advance of the day and and the set of the day and the d debits, and subtract any payments and credits, any non-financed fees and unpaid interest. This gives us the daily balance. Then we add up all of your daily balances in the billing cycle and divide this total by the number of days in the billing cycle to get your Average Daily Balance.
